

WILL STAUFFER

Data Scientist

Climate modeling & environmental analytics

White Salmon, WA | will@willstauffer.com | willstauffer.com | LinkedIn

SUMMARY

Data scientist with an environmental science background, specializing in climate-risk modeling and environmental forecasting. Builds financial models and data products for investment analysis and environmental planning.

TECHNICAL SKILLS

Python, SQL, pandas, NumPy, dbt, Snowflake, Git, CI/CD

Statistical modeling, machine learning, time-series forecasting, data visualization

EXPERIENCE

Intelligent | Data Scientist | Oct 2025-Present

- Developed and delivered SAFE for use by AMRO, the economic and financial policy organization serving ASEAN+3. The product models climate-related credit risk across 30,000+ public companies.
- Optimized financial and emissions models in Python and automated validation of client climate-risk reports.
- Developed AI-assisted coding and review workflows using parallel agents; shared guidance and practices to support team adoption.

Farmers Conservation Alliance | Data Analyst | Oct 2024-Feb 2025

- Gathered project data across the organization and built Tableau visualizations showing projects over time, supporting materials for Oregon legislators on irrigation-modernization funding.

Career Break | Travel around the world | Apr 2023-Apr 2024

Intelligent | Data Scientist | Dec 2020-Apr 2023

- Developed E-Score and T-Risk to assess equity risk and returns under different climate scenarios; T-Risk launched on FactSet covering 35,000+ equities globally.
- Built models, analyzed portfolios, and explained results to support climate-risk products for Bank of America and Société Générale.
- Contributed climate-risk analysis to the United Nations Joint Staff Pension Fund's first TCFD report.
- Converted a Vensim financial model to Python and migrated portfolio backtesting from Postgres to dbt and Snowflake.

SELECTED PROJECTS & EARLIER WORK

CDR.fyi | Data Science Consultant | 2024

- Completed a forecasting project assessing durable carbon-removal deployment against climate targets.

rivers.fyi | Coding bootcamp project | 2020

- Built a river-flow forecasting prototype using USGS and NOAA data and an LSTM model during a short coding bootcamp project.

WSN Media | Digital Media Creator | 2013-2020

- Created marketing content for Microsoft, Patagonia, Clif Bar, and National Geographic; partnered with Google on river-conservation VR content.
- Highlights include interviewing President Jimmy Carter for an environmental campaign, a National Geographic-supported expedition, and creating the film and helping with marketing for Oru Kayak's \$1M+ Kickstarter campaign.

EDUCATION

Colorado College | B.A. Environmental Science, cum laude | 2011

Lambda School | Data Science | 2020
